

“Low risk” Countries

Low risk countries do not require a travel provider visit and triage or travel RN can order/arrange COVID testing depending on patient preference. In general, do not have risk of malaria or yellow fever and do not typically need specific travel related vaccinations. “Low risk” countries include the following:

Canada

All European countries

Not pictured: Azerbaijan, Israel, Georgia, Kazakhstan*, Kyrgyzstan*, Tajikistan*, Turkmenistan*, Uzbekistan*
**Travel clinic visit advised, but not required*

Australia, New Zealand, and Pacific Island countries (excluding Papua New Guinea, Solomon Islands, and Vanuatu)

Bermuda and all Caribbean islands (excluding Haiti, Dominican Republic, Trinidad)

US territories including American Samoa, Guam, Puerto Rico, US Virgin Islands, Northern Mariana Islands, others
